> Shun Rao

skills

Python • C++ • C • Javascript • Go • Node.js • TensorFlow • OpenCV • Docker • HTML/CSS

experience

Hive.Al San Francisco, California
Software Engineering Intern

May 2018 - Aug 2018

- Led development of C++ face recognition pipeline, achieving real-time inference on 16 concurrent video streams through frame batching and multithreaded TensorFlow sessions on two GPUs. Combined face detection, keypointing and embedding with OpenCV processing to reach 95% recognition accuracy
- Implemented optimized vector kNN algorithm to search indices with 100k facial embeddings in under 50ms
- Built thread safe C++ GPU memory manager to handle 1000+ parallel RPC calls to TensorFlow model server
- Implemented gRPC service in Python and C++ for dynamic swapping of TensorFlow serving models

dominKnow Learning Systems

Ottawa, Ontario

Software Developer Intern

Jun 2016 - Aug 2017

- Built software simulation platform in Java, featuring linear-time version control for Elasticsearch documents
- Automated LESS compilation for authoring platform, also optimizing compilation for a speedup of 500%

Waterloop Hyperloop Design Team

Waterloo, Ontario

Communications Software Co-Lead

Sept 2017 - March 2018

- Spearheaded data pipeline design for three way communication between pod, relay servers and pilot controls
- Wrote multiplexed UDP library in Go to increase data throughput by 50x and reduce latency by 90%

University of Ottawa Heart Institute

Ottawa, Ontario

Mobile Development Lead

Feb 2016 - Feb 2017

- · Led development of pager app to prepare med students for residency by simulating surgical incidents
- Presented at the Canadian Conference on Medical Education & American Association of Surgical Education

projects

Order AI github.com/shunr/order-ai

- Conversational agent platform for takeout backed by restaurants in Waterloo and Toronto
- Built centralized Node.is server for speech processing and SIP call routing from each restaurant

Orpheus github.com/shunr/orpheus

 Machine learning experiment in Node.js+Python that trains a online classification model to learn individual music tastes using interactive feedback to Spotify previews

education

University of Waterloo

Software Engineering Class of 2022

- 91.8/100 cGPA (Top Decile)
- Dean's Honors List (All Terms)

achievements

2017 HackerRank 97th Percentile Contest Rating

2017 USA Computing Olympiad Platinum Division

2017 Waterloo President's Scholarship of Distinction

2017 ECOO Programming Contest Eastern Ontario Champion
